THE ACCURACY OF MECHANICS,
THE HUMAN TOUCH.

PINZE UNILOCK

PER AVANZAMENTO BARRA

Dall'esperienza applicativa dei materiali termoplastici addittivati, realizziamo da ormai 30 anni le **pinze avanzamento barra (contropinza)** per torni mono e plurimandrino.

Questa soluzione consente di lavorare con **estrema sicurezza** materiali delicati come acciai rettificati, alluminio, ottone, inox, etc., senza rischio di graffiature o grippature.

DISPONIBILI A MAGAZZINO
IN TUTTE LE MISURE

PRODUZIONI SPECIALI
IN BREVE TEMPO

Tutte le pinze **UNILOCK** sono **COMPATIBILI** per tutti i modelli di tornio plurimandrino

PUNTI DI FORZA

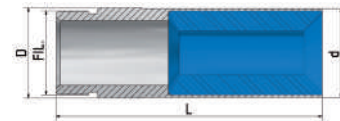

- **ELEVATA RESISTENZA ALL'USURA**
La durata media è di 5/15 km di barre secondo la pressione che si sviluppa sulle stesse
- **ASSORBIMENTO DELLE VIBRAZIONI**
Sensibile capacità di smorzamento dovuta alle caratteristiche dei materiali termoplastici
- **RIGENERAZIONE DEL FORO**
Dopo l'usura totale del foro, è possibile rigenerare la pinza allargando il foro stesso
- **RESISTENZA ALLA FORZA CENTRIFUGA**
La pinza ha un corpo cilindrico privo di tagli longitudinali. Questo garantisce un'elevata resistenza alla forza centrifuga e quindi all'usura (dai 4000 ai 7000 giri /1')
